

FACT SHEET

UPDATED: 11.02.22

PROJECT STATUS

A citizen participation meeting was held in November 2021. 100% design plans are complete. The project was sent out for construction bids and a contract was awarded in Sept. 2022. Construction is expected to begin in Dec. 2022 and completion is expected in early 2023.

PROJECT BUDGET

Funding for design, construction and inspection is from the Encinitas Sanitary Division (ESD) Rehabilitation Master Project (CE04H).

PROJECT LOCATION

Along the south side of B Street between Fourth and Third Street. Curb modifications at the corner of 4th and B Street is also included in the project. The project is located within the Encinitas Sanitary Division.

B Street Sewer Main Improvements Project (CE04H)

Maintaining safe and livable communities through well maintained infrastructure

ABOUT THE PROJECT

The B Street Sewer Main Improvements Project will upsize the existing 8-inch sewer main between Third Street and Fourth Street to 12 inches and will add a new sewer manhole for access. Curb modifications were added to the project at the corner of 4th and B Street.

This project was identified in the City's Sewer Asset Management Program which identifies sewer lines and manholes in need of rehabilitation. If these sewer lines are not rehabilitated or replaced, it will increase the risk of failure and wastewater spills, and possible contamination of groundwater and surface waters.

This project is part of the City's ongoing commitment to maintaining safe and livable communities through consistent maintenance, as outlined in the City's Strategic Plan.
